

Carbon Reduction Plan Example

Supplier name: Triton Construction Limited

Publication date: 30/04/2025

Commitment to achieving Net Zero

Triton Construction committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: January 2023 to December 2023	
Additional Details relating to the Baseline Emissions calculations.	
The base year is 2018/19 which is in alignment with the annual company carbon footprint report. We are continuously improving data collection for scope 3, and spend-based method as outlined in the GHG technical guidance for calculating scope 3 emissions, to use as the baseline year.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	7820
Scope 2	11800
Scope 3	23700
Total Emissions	43320 t

Current Emissions Reporting

Reporting Year: January 2024 to December 2024	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	191 t
Scope 2	11200 t
Scope 3	36000 t
Total Emissions	47391 t

Emissions reduction targets

Triton Construction Ltd is committed to reducing its absolute greenhouse gas (GHG) emissions from Scopes 1 and 2 by 21% by the year 2030, using 2025 as the baseline. This target applies to emissions from our offices in Yorkshire and the North West, as well as from our construction site offices and welfare.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

- Our operations are aligned with the Environmental Management System ISO 14001
- Introduced sustainability working group through our Employee Ownership Trust for improving the environmental performance of the company.
- We actively liaise with our supply chain to improve data collection and reporting accuracy.
- We introduced video conferencing policy.
- We are determined to continuously review our net zero ambitions and reduction targets as the company expands year on year. We make sure that an enhanced decarbonisation strategy reflects and addresses our emissions and environmental actions accordingly.

In the future we hope to implement further measures such as:

- We will continue to provide the relevant training and tools to our employees to reduce their personal carbon footprint, including their commuting and business travel, exploring salary sacrifice schemes.

- We will continue to analyse our supply chain involved in each projects to and obtain information on their carbon reduction journey and assist them where possible in their delivery.
- We will aim to replace all vehicles for electronic / hybrid cars and liaise with the rental companies to endure that only green fleet is operated

Declaration and Sign Off

This Carbon Reduction Plan has been reviewed and signed off by the board of directors.

Signed for and on behalf of Triton Construction Ltd:

Paul Clarkson, Managing Director
